cripple them as to render them inoperative, in order that the bull-dozers at the South and the roughs of the Northern cities might have full swing at the approaching Presidential election. This unworthy and distonest party purpose has been kept steadfastly in view ever since it was adopted as a policy. The Democrats of the last Congress refused to pass the requisite appropriations for the judicial service of the Government because they could not carry out their nullification project. The President called an extra session of the present Congress in order to perform the work which the old Congress had deliberately neglected. At the extra session there was a persistent but futile effort to coerce the President into an approval of the proposed nullification, and, when that attempt failed, an adjournment was taken without appropriating the pay for the Executive branch of the United States judicial system. The perversity of the Democratic policy was emphatically condemned by the people in the elections of 1879, when the work of the extra session was in issue. The Democrats were defeated everywhere. Notwithstanding this pointed rebuke, the Democrats renewed their efforts at

injustice of withholding the necessary supplies, and the injury that would unquestionably be done to public in-terests. The United States Court in lowa must be closed with a full and important docket of litigation that de-

The United States Courts will of necessity close unless Congress directs the pay of their officers, and the public who pay so dearly for the support of Government will suflosses amounting to millions of dollars by the inexcusable delay in litigation. This would be bad enough if it were the unavoid-able result of an insufficient revenue, but it is infamous when the States Treasury is overrunning with native has been the result, as will be States Treasury is overranning with money, and when it is brought about to assist in the perpetration of a partisan wrong. It may be that the nullidars will be brought to their senses by the actual imminence of the necessity for adjourning the United States Courts, and will now seek to make a tardy atonement for the wrong and injury they have put upon the public. Even if they shall do this now, because they dare not longer fly in the face of public indignation, the people will not forget that justice in the Courts, which is certainly the first claim the citizen has upon Government, has been retarded and in part denied in order that the Democratic majority might urge the first, and is now, the only pretext for withholding the necessary authority to pay the United States Marshals and keep oren the United States Courts.

The Government Service Suffering.

The people are so deeply absorbed in the Presidential question that they are failing to take due notice of the fact. that several important branches of the Government service are suffering severely from the mismanagement and partisan pig-headedness of the Democrats in Congress. Perhaps the Judiciary Department is suffering more than any other, the United States Courts in several States having been obliged to close on account of the failure of Congress to provide for their running ex-penses. This has just occurred in Iowa. A few days ago the United States Marshal for that district wrote to the Attorney-General stating that he had al-ready advanced more than ten thousand dollars for the miscellaneous expenses of the Court, and that he felt unable to continue that course any longer, and asking for instructions. In his reply,

the Attorney-General says:
